Contractor

Seabreeze General Construction
20-30 47th Street
Astoria, NY 11103

Architect/Engineer

Thornton Tomasetti
51 Madison Avenue
New York, NY 10010

Planning for the rehabilitation of the state office building parking garage, the engineers had to take into account the number of cars that use the 55,000 square foot facility on a daily basis. This was a 2 year 4 phase project that included extensive full depth replacement. The engineers chose Strongcoat SC-113 traffic membrane system because of its performance characteristics.
