

## Chick-Fil-A

### Installation

2007

### Location

Stone Mountain, Georgia

### Materials

Strongcote SC-113  
Heavy Duty Vehicular  
Traffic Coating with  
Migratory Corrosion  
Inhibitors

### Deck

Reinforced Concrete

### Contractor

Southeast Restoration  
& Fireproofing Co.

This project called for the vertical expansion of the Chick-Fil-A corporate parking structure. The new concrete was shot-blasted and two coats of SC-113 Heavy Duty Vehicular Traffic Membrane were applied. This provided the owner added protection from water intrusion and a skid-resistant surface superior to the concrete alone. This is an example of how new concrete can be protected using Strongcote.
