Gilsanz, Murry, Steficek, LLP
129 West 27th Street . 5th Floor
New York, NY 10001

In 2009 and 2010, the IZOD Center, one of the largest arenas in North America chose Strongwall Products to restore their gate staircases. Two more are scheduled to be renovated in the future. The Strongcrete horizontal mortar was used to repair the concrete. The Strongcote SC-111 Pedestrian Grade Traffic Coating and Resicolor #4 color topping were chosen to provide an anti-slip surface on the concrete stairs where hundreds of spectators for countless sports and entertainment events use to enter the arena annually.
