Strongcote SC-111/113  
Vehicular Grade Coating

**Deck**  
Cast-in-Place/Post Tension

This 350,000 square foot interior covered garage provides parking for the prestigious offices and residential high rises. Shortly after construction, it was determined that the shallow rebar cover, coupled with random hairline cracking, would require a membrane coating. The cracks were addressed and Strongcote SC-111/113 vehicular grade coating was chosen as the concrete protective system due to its zero VOC, odorless qualities, and its fast cure time.
