

Mercy Hospital

Installation

2007

Location

Cincinnati, OH

When the contractor was contacted to “fix” the 30,000 sq.ft. precast Tee garage surface he chose Strongwall’s SC-113 vehicular traffic coating. With winter temps only days away in what was an unusually warm season he needed a product that could be applied in less than perfect weather and could be completed quickly. The entire 30,000 sq.ft. was completed on one day and striped the next.
